EDUCATION

• Institute of Engineering And Technology DAVV, Indore

Bachelor of Technology in Computer Engineering

Oct 2022 - Apr 2026

CGPA : 7.12

EXPERIENCE

• Finacplus

Software Engineer Intern - Frontend

Oct 2025 - Present

- Contributed to building a loan-acquisition **Fintech platform** serving **5K+ users** optimized performance using **Redux store caching** and React memoization, reducing redundant API calls by **15%**.
- **Built a browser notification service using the Service Worker API** — handled push subscriptions and rendered real-time in-app alerts, improving application status visibility for lenders.
- Built **permission-aware UI components** driven by tenant-level config, correctly handling composite/multi-role users across 10+ roles for accurate, role-sensitive feature visibility.
- Eliminated 12+ **Trivy-flagged security vulnerabilities** tied to **react-pdf** by building a **custom document viewer** with **pdfjs-dist**, removing a **high-risk dependency** and improving long-term **maintainability** of the document rendering pipeline.
- Collaborated in an **Agile/Scrum** environment across sprint planning, **code reviews**, and retrospectives.

PROJECTS

• Fido-Finder

Website to Find Lost Pets

[Project Link](#)

- Architected a full-stack platform enabling **pet identification** and reunification through QR code-based tags with 95% data accuracy. Implemented **secure authentication using JWT** for pet owners.
- Allowed pet owners to manage pet profiles and recovery with **40% faster profile creation** through optimized forms.
- Containerized the application using **Docker** with a multi-service **docker-compose.yml** (frontend, backend, MongoDB), **deployed to AWS EC2** — configured security groups, environment variables, and an **Nginx reverse proxy**, gaining hands-on experience with cloud infrastructure provisioning and cloud-native deployment workflows.
- **Tech Stack:** React.js, Tailwind CSS, Node.js, Express.js, MongoDB, Docker, AWS EC2, Nginx

• Walmart Seller Hub

Seller Ranking Optimizer

[Project Link](#)

- Discovered 60% of sellers suffered **reduced sales on Walmart Marketplace** due to Amazon-style listings conflicting with Walmart's Polaris ranking algorithm; built a **dynamic seller dashboard** boosting sales by 20%.
- Integrated **Gemini API to deliver AI-generated suggestions** for ranking boosts
- Implemented **Socket.IO** to push **real-time ranking updates and alerts** to seller dashboards, enabling **instant visibility** into sales rank changes without page refresh.
- Updated and **optimized order fulfillment routes by 40%**, enabling route visualization and reducing delivery inefficiencies.
- **Tech Stack:** React.js, Gemini API, Leaflet.js, OpenRouteService

TECHNICAL SKILLS

Languages: C++, SQL, JavaScript, HTML

Frontend Technologies: React.js, Zustand, Tailwind CSS, Redux, Socket.io

Backend Technologies: Node.js, Express.js, MongoDB, REST APIs

Cloud & DevOps: AWS EC2, Docker, Jenkins, Nginx, SonarQube

Packages: Axios, jsonwebtoken, bcrypt, React-Toastify

Course Subjects: Database Management Systems (DBMS), Data Structures and Algorithms (DSA), Object-Oriented Programming (OOPS), Computer Networks (CN)

Development Tools: Git, GitHub, VS Code, Postman, Vercel, Render, Forgejo

ACHIEVEMENTS

- Secured **global rank 457** in LeetCode Biweekly Contest 155
- Achieved a **1647 max rating on LeetCode**, ranking among the top performers on the platform
- Solved over 500+ Questions on LeetCode/GeeksforGeeks
